

1 Collect reclaimed PVC-u windows

Windows which might otherwise go to landfill are taken to our advanced recycling facility

2 Segregate & regrind

Metal, glass, gasket and plastics are reground and separated out to be individually processed

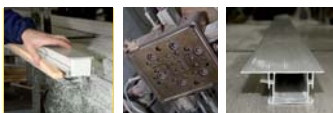

3 Pelletise into PVC-u granules

The PVC-u chippings are granulated to a uniform size, colour separated, cleaned, ready to be extruded into new cavity closers

4 Extrude as 100% recycled product

5 Install

The material's lifecycle begins again. PVC-u can be recycled efficiently numerous times for hundreds of years of re-use!
